

CAT. NO. KLN-04-2011

CHEMICAL DEGREASER

CHEMICAL DEGREASER is a multipurpose water soluble cleaner. It cleans away dirt, oil and grease and other contaminants from floors, machineries, molds formworks, tools and metals. It is safe to use, non fuming, and non-flammable. The blend of low foaming surfactants and non-caustic alkaline components provide excellent cleaning properties.

ADVANTAGES

- Water-based, hence pose no fire and fume hazard.
- Powerful surfactant penetrates and lifts grimes quickly.
- Heavy-duty cleaning action.

DIRECTION FOR USE

- **CHEMICAL DEGREASER** is ready to use and do not normally require dilution. First remove any thick, accumulated grease or oil by scraper then apply chemical degreaser liberally on to the affected area and scrub with a nylon-bristled brush. After scrubbing, allow the degreaser to stand for 20 minutes for its emulsifying action to take effect.
- After 20 minutes, the grime can then be hosed down with water or steam while scrubbing with brush.
- For severe contamination on large areas of concrete floors, it is highly recommended to use high pressure steam cleaning and mechanical floor scrubber to remove the treated grime.
- For cleaning small tools, chemical degreaser can be used as a dip. Immerse the contaminated tools overnight, then wash clean with water.

COVERAGE

Approximately 2 - 4 square meters per liter.

PACKING

CHEMICAL DEGREASER is packed in 5 and 20 liter pails.

SHELF LIFE

At least 12 months from date of manufacture in original container under warehouse condition.

HEALTH / SAFETY

CHEMICAL DEGREASER does not require special handling procedures. However, it is always advisable to wear coveralls, protective eye goggles and rubber gloves when using chemicals. Accidental splashes to the eyes and skin should be avoided. Consult MSDS for specific precautions.
